Vegetation

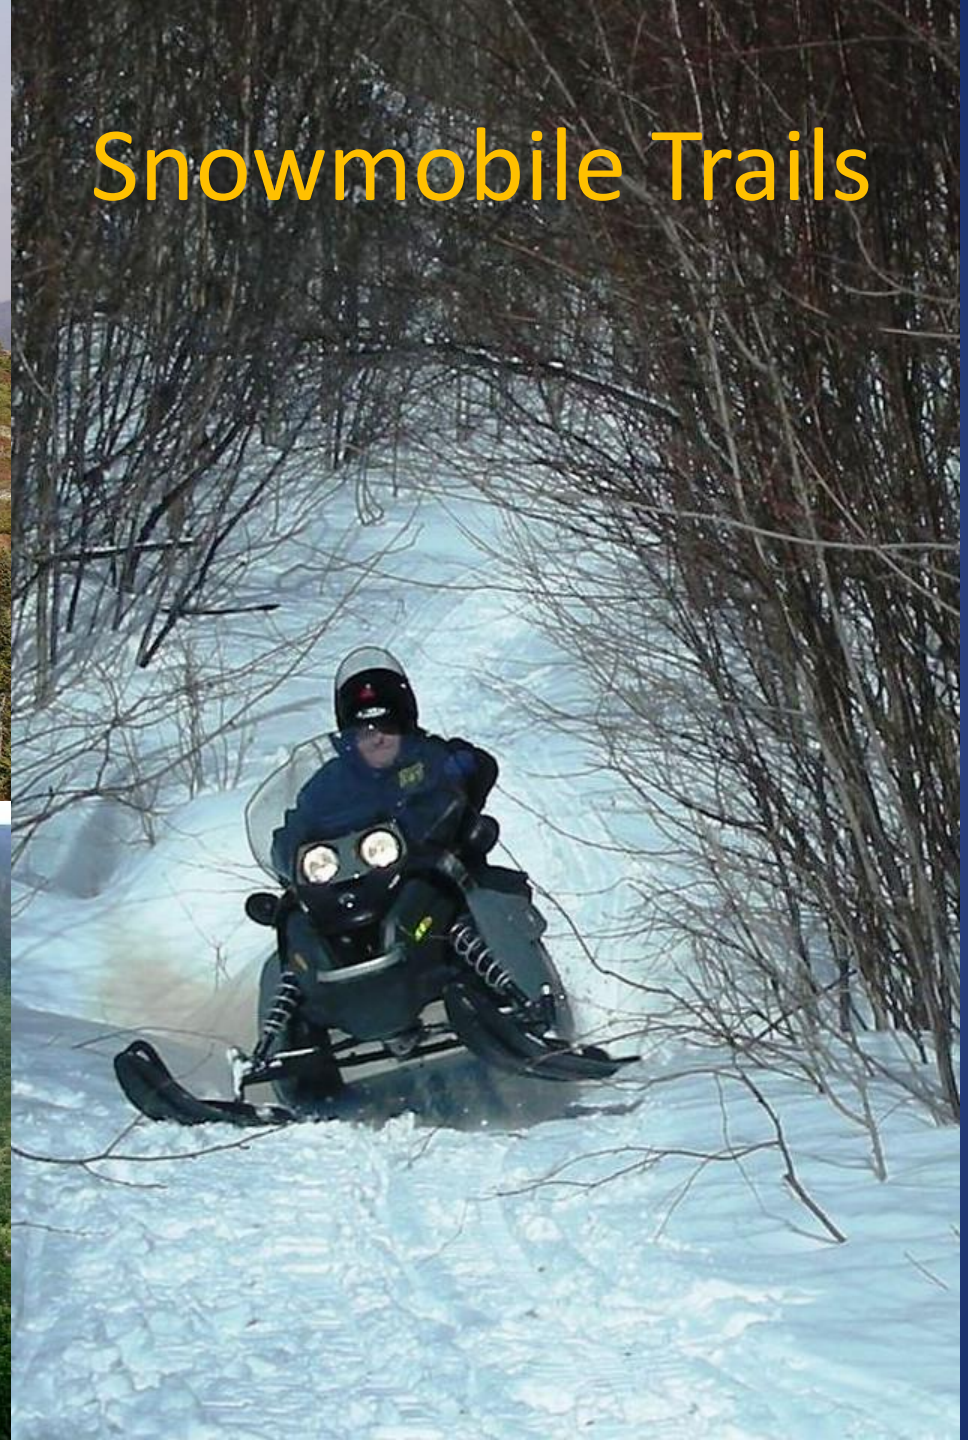

A landscape photograph showing a mountain range under a clear blue sky. The foreground is dominated by a dense forest with trees in various stages of autumn color, including vibrant reds, oranges, and yellows, interspersed with some evergreen trees. Several dead, white, skeletal trees are scattered throughout the forest. In the background, the mountains are covered in a thick forest, with some peaks appearing more distant and less detailed. The overall scene is a mix of natural beauty and signs of environmental impact.
