December 3-4

Climate Change & Vermont

December 3: Preparing for Climate Change

Natural resource managers face the tremendous challenge of developing and implementing management actions that help ecosystems respond to climate change. This session will:

- Provide information on the current and anticipated effects of climate change on Vermont and its forests
- Describe resources and tools that can be used to integrate climate change into management
- Outline adaptation concepts and strategies in the context of sustainable forest management
- Identify actions that enhance the ability of forests and other ecosystems to adapt to changing conditions

Real-world examples of adaptation projects will be featured, and participants will engage in a variety of interactive activities to identify climate change issues and potential adaptation actions.

This session is being organized by the Northern Institute of Applied Climate Science & the Vermont Agency of Natural Resources Department of Forests, Parks & Recreation.

Details

December 3, 2013 (all day)

**Judd Hall,
Vermont Technical College**

VT Forests, Parks & Recreation

December 4: Forest Adaptation Planning & Practices

This active, hands-on training will be held on December 4 for a limited number of participants. Natural resource managers will incorporate climate change considerations and identify actions for adaptation into their own real-world forest management projects. Contact [Sandy Wilmot](mailto:Sandy.Wilmot@anr.state.vt.us) to request additional information or inquire about attendance.
